Web of Science

Empower your Research and Discovery

— What is Web of Science?

The Web of Science is a global, multidisciplinary research discovery platform and citation database.

— How can Web of Science empower your research?

1. **Using its search tools** find top journals, books, and conference proceedings in sciences, social sciences, arts, and humanities.
2. **Using its citation index and linked references** analyze your search results and reveal connections between them...

Create an account in Web of Science

— with your AUA affiliated email to:

- Customize your search
- Save search queries
- Save records
- Create search histories & alerts
- Create Citation alerts

What we will cover today?

- Create an account/log in
- Search for records using Web of Science search tools
- Create a search alert
- Save lists
- Analyze results and demonstrate citation reports
